**The United States Coast Guard Navigation Information Service (NIS)**

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS, DGPS, and LORAN-C. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: <http://www.navcen.uscg.gov/gps/status/default.htm>. In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or LORAN service. Mariners are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, Email: [webmaster@smtp.navcen.uscg.mil](mailto:webmaster@smtp.navcen.uscg.mil), or on the World Wide Web at: <http://www.navcen.uscg.gov>

## II. DISCREPANCIES-DISCREPANCIES CORRECTED

This section lists all discrepancies to Aids to Navigation reported and corrected since the last published list. A discrepancy is a change in the status of an aid to navigation that differs from what is published and or charted. **Unless otherwise indicated, missing and destroyed structures are presumed to be in the immediate vicinity. Mariners should proceed with caution.**

**IV. CHART CORRECTIONS**

(Explanation of Format)

Corrective action affecting charts is contained in this section. Chart corrections are listed numerically by chart number, beginning with the lowest and progressing through all charts affected. The correction listed pertains to that chart only. It is up to the mariner to decide which charts are to be corrected. The following example explains the individual elements of a typical correction.

Chart number	Chart edition	Edition date	Last Local Notice to Mariners	Reference datum	Source of correction	Current Notice to Mariners
11534	26th ed.	12/14/91	LAST LNM 41/92	NAD 83	(CDG07)	45/00
	Myrtle Grove Sound to Fear River to Casino Creek					
	Add		*Boguse Channel Light 1, Fl G 2.5s, 16 ft, 7M		32-48-00.000N	079-15-00.000W
		(Temp)	indicates Temporary Correction			
	Corrective action		Object of corrective			Position action

The letter (M) immediately following the chart number indicates that the correction should be applied to the metric side of the chart only. (TEMP) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (m). (\*) Asterisk is used to identify Private Aids.

FL-LAKE OKEECHOBEE WATERWAY-KISSIMMEE RIVER: Navigation Locks Reopened.

Navigation locks and boat ramps in the northern half of the Kissimmee River reopened on September 18, 2003. Boaters are urged to continue to be cautious particularly in the area of three weirs in the C-38 in northern Highlands/Okeechobee counties. High flows, dangerous currents, and the loss of boat barriers in the river prompted the closure of navigation locks at structures S-65, S-65A and S-65C in August. The S-65 navigation lock is located at the southern tip of Lake Kissimmee, where it flows to the Kissimmee River. S-65A is about 11 miles to the south, and S-65 C is roughly 40 miles south of Lake Kissimmee by water near Lorida, a small community just east of Sebring. Concrete barriers that had been placed across the boat ramps at S-65 and S-65C to restrict access will be removed and boat barriers will be reinstalled in the area of the three weirs and near S-65A. The high flows along the Kissimmee River were brought about by more than 10 inches of rain that fell throughout the upper Kissimmee River in August, nearly doubling the amount of rain expected. The extreme rainfall aggravated already high lake levels. However, with about two weeks of relatively dry weather, the lakes within the Kissimmee Chain of Lakes are back to normal summer levels. For up-to-date information about navigation in the Kissimmee River, contact Bill Graf at the SFWMD Orlando Service Center, (407) 858-6100; or Missie Barletto at the SFWMD Okeechobee Service Center, (800) 250-4200 or (863) 462-5260 or visit their website at <http://www.sfwmd.gov/>.
